

# VERSKAMHETSRAPPORT MRCIT 2018

---

## MASTER RECEPTION COMMITTEE | OPERATIONAL PLAN 2018 | LP2

Having completed our reception in the previous study period (LP1), this study period is somewhat less active for MRCIT. Nevertheless, we have been preparing for the next MRCIT, with recruiting/information meetings, 'inspring' (verbal recruitment efforts) and *aspning* preparations already this semester.

We have announced our *aspning* events (the information meeting/prep night back in November, and an upcoming Yule Dinner) on chalmers.it and our Facebook page, and are scheduled to have it together with the Aspar in the evening of Monday 17<sup>th</sup>. Master students from IxD and Software Engineering are very welcome to attend.

### WHY SO EARLY WITH THE ASPNING?

The reason we begin early with *aspning* preparations is that, since all of MRCIT is in their second year of their Masters programme, we will be significantly less available next semester as we do our thesis work in various locations (and countries).
